

Module Migration Own Funds

RegTech Advisory guides users through the upcoming module migration.

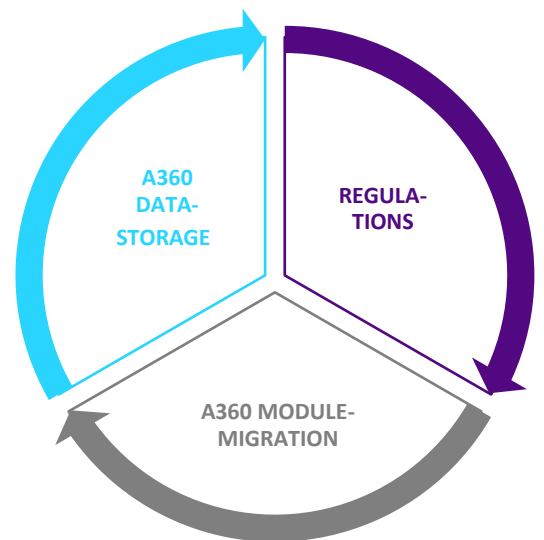

Current Challenges

The continual expansion of regulatory scope requires ongoing improvements and modernization to the standard software Abacus360 Banking. Having completed the upgrade to Version 7, the module migrations for EBA-Reporting are scheduled from April 2021 until the end of 2022. The migration starts with an Own Funds module that has been upgraded and optimized for Abacus360 Banking Version 7.

Our RegTech Advisory Offer

For the migration, RegTech Advisory has prepared an efficient and standardized approach for clients. We will be drawing upon established and proven tools to support users in a goal-oriented manner.

Abacus360 Banking – Timeline Overview

Benefits of RegTech Advisory

Standardized Strategy

We offer comprehensive services that leverage software tools based on a standardized approach for deliverables and numerous years of expertise. Our goal is a fast, smooth, and efficient migration of the Own Funds module.

Automated Tests

Tests rely on the report compare function that is available to all users. Together with our RegTech Advisory service, we offer our clients an additional functionality to accelerate these tests processes. Deviations are an expected outcome of the test process for adjustments or new implementations, and our Regression Testing Tool uncovers the reason behind the deviation.

Competence

As advisors of the software developer, we offer software and professional expertise in subject-matter and technical implementation from one source / hand. Our direct access to the entire RegTech network (product management, software development, managed services) and the opportunity for software support result in successful projects.

About BearingPoint RegTech

BearingPoint RegTech is a leading international provider of innovative regulatory, risk, and supervisory technology solutions (RegTech, RiskTech, and SupTech) and services along the Regulatory Value Chain for financial services. Customers representing 6,000 firms worldwide, among them large international banks, a major part of the largest European banks, leading insurance companies as well as supervisory authorities and central banks, trust BearingPoint RegTech's products and services. BearingPoint RegTech works closely with regulators and, as a member of standardization bodies such as XBRL, actively contributes to the standard-setting process. BearingPoint RegTech combines regulatory know-how with a proven, reliable, and forward-looking RegTech solution suite, expert consulting capabilities, managed services, and training seminars.

This document is operated by BearingPoint Software Solutions GmbH, part of the BearingPoint RegTech group of companies which is not affiliated with and independent from BearingPoint Holding B.V. and its affiliates.
